

ARMAR Corp.® General Technical Co-Operation

DREBG-73

TACTICAL SUPERIORITY

DREBG-73 is a personal, single use disposable weapon with a reactive enhanced blast effect grenade.

The weapon is suitable for warfare operations, antiterrorist missions in urban environment or/and cross country. It is intended for defeating enemy manpower in the open, in trenches, shelters, bunkers, urban buildings and fortifications, armored and unarmored vehicles.

The weapons characteristics results in the achievement of tactical goals with precise target hit, without threatening personnel and equipment not related to the conflict.

DREBG-73

TECHNICAL SPECIFICATIONS

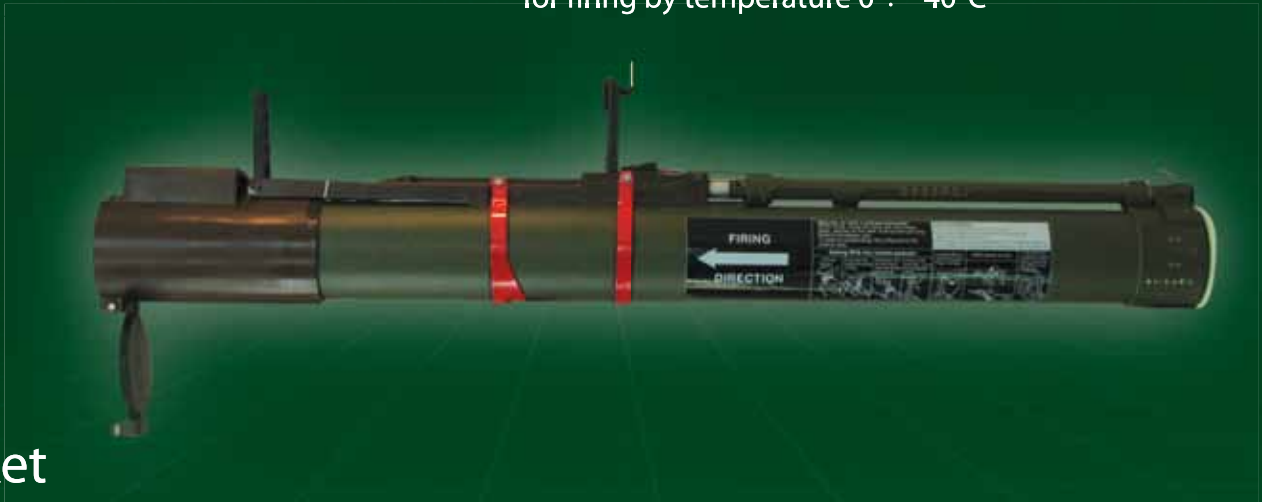

Complete Weapon System

Designation: Disposable-launcher Reactive Enhanced Blast-effect Grenade-73 (DREBG-73)

Weight, kg: 4,1
Length, unarmed (closed), mm: 765
Length, ready to fire (extended), mm: 850
Deployment time, s: 8...10

Front Sight: Reticle, calibrated for ranges of 50, 100, 150 and 200 meters (marked as 5, 10, 15, 20)

Rear Sight: Peep, adjustable to temperature change in two positions:
+ for firing by temperature $0 \div +50^{\circ}\text{C}$
- for firing by temperature $0 \div -40^{\circ}\text{C}$

Rocket

Caliber, mm: 72,5
Range sighting, m: 200m
Direct fire range, m: ~100m

Fire pattern:

Vertical target at the direct fire range, m
- lateral-deflection : 0,6
- vertical-deflection: 0,6

Aria target

- in range Epr/Xmax: $\leq 1/50$
- in deflection Epd, m: ≤ 5
